SUMMARY

Mid Full Stack Developer with 3+ years of experience building web applications using React, Next.js, Node.js, Java, SpringBoot and relational databases. Proven track record of delivering 5+ client projects including real-time collaborative applications, landing pages, and mobile apps. Skilled in API development, database management, and version control with Git. Currently studying at 42 Málaga eager to apply technical skills and collaborative mindset in a professional development team.

EXPERIENCE

FULL-STACK WEB DEVELOPER

FREELANCE

May 2022 - Present, Málaga

- Developed and deployed 7+ full stack web applications for enterprise clients using Next.js, Node.js, React, and relational databases (MySQL, PostgreSQL).
- Designed and implemented scalable RESTful APIs with Express.js, including JWT authentication, data validation, and structured error handling.
- Implemented real-time communication with Socket.IO for collaborative applications with multiple concurrent users.
- Managed complex relational databases with MySQL/PostgreSQL models, query optimization, and schema migrations.
- Integrated third-party APIs, payment services, and external authentication systems in production applications.
- Used version control with Git/GitHub, following professional workflows with branches and pull requests.

ADMINISTRATIVE

Dalitermoplasticos

May 2018 - April 2022, Mar del Plata, Buenos Aires, Argentina

- Provided support for general office tasks and daily administrative operations.
- Managed and organized administrative files and documents for efficient record-keeping.
- Handled phone and in-person communication with clients and vendors.
- Performed document control and administrative process management.

PROJECT

Task Manager App

Dalitermoplasticos • October 2024 - February 2025

- Developed a real-time collaborative task manager using Node.js, Express.js, and Socket.IO for multi-user synchronization.
- Implemented CRUD operations for task management with instant updates across all connected clients.
- Built WebSocket-based communication to enable real-time collaboration between multiple concurrent users.
- Designed and implemented a RESTful API with Express.js for task creation, editing, deletion, and status updates.
- Created user authentication and session management to ensure secure access and personalized task views.
- Integrated MySQL/PostgreSQL database for persistent data storage with optimized queries for task retrieval.
- Deployed the application on a VPS with proper environment configuration and security measures.

Marea Alojamientos

Freelance • www.alojamientosmarea.com/ • April 2024 - June 2024

- Developed an attractive and modern landing page tailored to the client's needs.
- Implemented a contact form and redirects to the company's communication channels.
- Assisted with domain registration and configured the SSL certificate.
- Deployed the project on my own VPS.
- Connected Google Ads Tag to the site so they can manage their campaigns.

DV Properties

Freelance • dvpropertiesonline.com/ • January 2024 - February 2024

- Modified and customized an existing WordPress website to meet updated client requirements and improve user experience.
- Configured and optimized image galleries using WordPress plugins, ensuring responsive design and fast loading times.
- Integrated and configured contact forms with proper validation, spam protection, and email notification settings.
- Customized WordPress theme CSS and layout to align with client's branding and design preferences.
- Troubleshooted and resolved plugin compatibility issues to ensure smooth website functionality.
- Tested contact form submissions and email deliverability to guarantee reliable client communication.
- Provided client training on managing gallery content and monitoring form submissions through WordPress dashboard.

FEP Envases Web

Freelance • www.fepenvases.com/ • August 2022 - September 2022

- Developed an attractive and modern landing page tailored to the client's needs.
- Implemented a contact form and redirects to the company's communication channels.
- Assisted with domain registration and configured the SSL certificate.
- Deployed the project on my own VPS.
- Connected Google Ads Tag to the site so they can manage their campaigns.

Dalitermoplasticos Web

Freelance • www.dalitermoplasticos.com/ • May 2022 – July 2022

- Developed an attractive and modern landing page tailored to the client's needs.
- Implemented a contact form and redirects to the company's communication channels.
- Assisted with domain registration and configured the SSL certificate.
- Deployed the project on my own VPS.
- Connected Google Ads Tag to the site so they can manage their campaigns.

EDUCATION

Software Engineer

42 • Málaga, Andalucía, Spain • 2026

- Completed intensive peer-to-peer learning program at 42 coding school, mastering C/C++ programming and low-level system concepts.
- Developed strong problem-solving skills through project-based curriculum covering algorithms, data structures, and computer science fundamentals.
- Collaborated with peers in a self-directed learning environment without traditional teachers or lectures.
- Built multiple projects from scratch including shell implementations, memory management systems, and network programming applications.
- Gained proficiency in Unix/Linux systems, version control with Git, and debugging complex codebases.
- Practiced code review and pair programming techniques, providing and receiving constructive technical feedback.
- Developed autonomy and research skills by independently learning new technologies and solving challenging programming problems.
- Worked on group projects requiring teamwork, communication, and coordination to deliver functional software solutions.

CERTIFICATIONS

Javascript

CoderHouse • 2023

- I learned the fundamentals of JavaScript for Web Development.
- We worked with Tailwind CSS, and with SCSS.

Introduction to Algorithms

TODO CODE • 2024

Introduction to Cybersecurity

CISCO • 2024

- Completed Cisco NetAcad Introduction to Cybersecurity course, gaining foundational knowledge of security principles and best practices.
- Learned about common cyber threats including malware, phishing, social engineering, and ransomware attacks.
- Studied data protection techniques, encryption methods, and secure communication protocols.
- Explored cybersecurity frameworks, compliance standards, and risk management strategies.
- Gained understanding of network security concepts including firewalls, intrusion detection systems, and access control.
- Learned about ethical hacking principles and vulnerability assessment methodologies.

Networking Basics

CISCO • 2025

- Completed Cisco NetAcad Networking Basics course, mastering fundamental networking concepts and protocols.
- Studied OSI and TCP/IP models, understanding how data flows through network layers.
- Learned network topology design, IP addressing schemes (IPv4/IPv6), and subnetting techniques.
- Gained hands-on experience with network configuration, routing protocols, and switching fundamentals.
- Explored network troubleshooting methodologies and diagnostic tools for identifying connectivity issues.
- Studied wireless networking standards, network security basics, and best practices for network administration.

SKILLS

JavaScript, React, Next.js, React Native, Angular

NodeJs, Python, API Rest

MySQL, PostgreSQL, MongoDB, Firebase

R, C, Linux, Git, SocketIO, WordPress, Expo

Español, Inglés
